### Producer Prices

Market supply of all the paddy varieties were limited due to the off season. However, the producer prices for most of the paddy varieties tend to decrease due to the price restrictions in retail level. Hence, the producer price for short grain paddy decreased slightly by less than 5% in most of the major producing areas. Producer price of short grain paddy ranged from Rs.120.00-128.00/kg. Producer price of keeri samba ranged from Rs.130.00 to Rs.150.00/kg, showing a 10% decrease in Dehiattakandiya. Meanwhile, the producer price of long grain red paddy increased by 6-7% due to increased demand.

Compared to the same period last year, producer prices for all paddy varieties have increased across all most all the price collection areas, with long grain red experiencing the highest price rise, ranging from 55-56%.

## Rice Prices Demand/Supply Situation

### Wholesale Prices

Wholesale prices for all the rice varieties have not changed significantly compared to the previous month. The price of Keeri Samba ranged between Rs.290.00 and Rs.320.00/kg. ## Prices and Supply/Demand Situation

Due to a decreased supply from major producing areas, the prices of all vegetables have increased. The wholesale prices of up-country vegetables have risen by 30% to 135%. The highest price increase was observed in carrots, with prices rising by Rs. 135.00/kg, ranging from Rs. 120.00 to Rs. 450.00/kg. Tomato prices surged by 277%, reaching Rs. 278.00/kg. For low-country vegetables, wholesale prices increased by 1% to 164%, except for cucumbers, which saw a 16% price reduction. The highest price increase of Rs. 311.00/kg was recorded for bitter gourd. Green chili prices rose by 61%, while lime prices decreased by 8%. Compared to the same period last year, wholesale prices of most vegetable varieties have increased by 1% to 90%, with the highest price increase

seen in leeks. However, prices for carrots, cabbage, ladies' fingers, and long beans have decreased by 12% to 38%.

In line with the increase in wholesale prices, retail prices of all vegetable varieties have risen, except for cucumbers. Retail prices of up-country vegetables increased by 26% to 72%, with the highest price increase of 154% recorded for tomatoes, reaching Rs. 331.00/kg. Retail prices of low-country vegetables increased by 8% to 90%, again with the exception of cucumbers, which saw a 10% price decrease. The highest average retail price of Rs. 988.00/kg was reported for drumsticks, while the lowest price of Rs. 226.00/kg was observed for cucumbers. Green chili prices rose by 27%, while lime prices decreased by 6%. Compared to the same period last year, retail prices of most vegetable varieties have increased by 11% to 57%, with the highest price increase observed in leeks.

## 4. Fruits

### Prices and Supply/Demand Situation

In June 2024, the wholesale prices of major fruit types, including bananas, mangoes, and papaw, increased, while the price of pineapple decreased. Among the banana varieties, the highest price increase was recorded for *ambul* bananas (26%), followed by *kolikuttu* (25%) and *seeni* (19%), due to a reduced supply from major producing areas. For pineapples, prices for all sizes decreased by 49% to 53%. In the case of mangoes, the highest price increase was observed for *vilad* mangoes (22%) due to low stock levels. Among other fruit varieties, most prices rose due to a lean harvesting period. The highest price increase was recorded for papaw (91%), followed by orange (46%) and passion fruit (10%), all due to low stock. Conversely, avocado prices decreased by 9%, while imported grapes saw a 5% price drop, attributed to increased supply from the ongoing avocado harvest and adequate imported grape stocks. Compared to the same period last year, wholesale prices for most fruit varieties have increased, with the highest price increase seen for passion fruit (138%).

In June 2024, the retail prices of major fruit varieties, with the exception of pineapple, increased. Among the banana varieties, the highest price increase of 14% was recorded for *anamalu*, followed by *ambun* bananas with a 12% increase. For pineapples, the prices of all sizes decreased by 42% to 44%, reflecting the drop in wholesale prices. Retail prices ranged from Rs. 350.00 to Rs. 600.00/fruit for medium-sized pineapples in the Colombo suburbs markets. Among the mango varieties, the price of *vilad* mangoes increased by 10% due to limited stocks in the market. Regarding other fruit varieties, the retail prices of orange (35%), papaw (23%), and slime apple (10%) increased, while avocado prices decreased by 31%. Compared to the same period last year, the current retail prices for most fruit varieties have increased, with the highest price increase seen for passion fruit (83%).

Headline inflation, measured by the year-on-year (Y-o-Y) change in the Colombo Consumer Price Index (CCPI, 2021=100), rose to 1.7% in June 2024, compared to 0.9% in May 2024. Food inflation (Y-o-Y) also increased, reaching 1.4% in June 2024 from 0.0% in May 2024.

Reflecting the rise in food inflation, prices of most fish varieties increased in June due to reduced supply during the off-season along the Southern and Western coastal belts. Heavy rain and stormy weather further disrupted fishing activities in the Southern, Western, and North-Western coastal regions.

At the wholesale level, the highest price increase was recorded for *hurulla* (28%), followed by *paraw*, *thora*, and *salaya* (14%). Prices of other varieties rose by 4%–10%, except for *mora* and small shrimp, which saw price drops of 1% and 3%, respectively. Compared to the same period last

year, wholesale prices for most fresh fish varieties declined by 3%–15%, with the steepest drop observed for *hurulla*.

In the retail market, most fish varieties saw price increases aligned with wholesale trends. The highest increases were noted for *hurulla*, *thora*, and *thalapath* at 8%. Prices for other varieties rose by 7%, except for *salaya*, *balaya*, and small shrimp, which remained stable or decreased. Year-on-year, retail prices for most fresh fish varieties dropped, with the most significant reduction of 28% observed for *balaya*.
